Options Order Flow Rebate Program:
Terms & Conditions

If you have a brokerage account with Open to the Public Investing, Inc. (“Public Investing”) and have successfully enabled options trading, you will be enrolled in our Options Order Flow Rebate Program (“Program”).

How does the Options Order Flow Rebate Program work?

When you successfully complete an options trade, Public Investing will share with you a percentage of our order flow revenue from that transaction (“PFOF Revenue”). We are calling the revenue that Public shares with you an “order flow rebate,” and this rebate will be deducted from the cost of your applicable options transaction.

How do I enroll in the Options Order Flow Rebate Program?

In order to enroll in the Program and receive order flow rebates for your options trades, you must meet the following requirements:

1. You must have an existing brokerage account with Public Investing (“Public Account”).
2. You must apply to enable options trading on your Public Account and be approved for options trading by Public Investing.

How much rebate will I get?

If you enrolled in the Program before 11:59 PM EST on March 31, 2024, then Public Investing will give you a rebate equal to 50% of our PFOF Revenue for each option transaction you complete. As of April 1, 2024, the dollar amount for this 50% rebate is equal to $0.18 per options contract.*

If you enroll in this Program after March 31, 2024, Public Investing will give you a minimum rebate equal to 16% of our PFOF Revenue for each option transaction you complete. The size of your rebate increases depending on whether you join Public as a referral and how many friends you invite to join Public as referrals (see “Referral” section below).

- If you sign up for Public Investing as a “Referral” yourself and enroll in the Program after March 31, 2024, you will start at Tier 2.
- For every friend you invite that qualifies as a “Referral”, your order flow rebate will increase to the next tier, up to the maximum rebate.
Note that Public Investing may decline any Program enrollment requests and may modify the above rebate rates at any time in its sole discretion for both new and existing members of the Program.

*Order flow rebates are a percentage of the PFOF Revenue earned by Public Investing from your options transactions, and are expressed here as dollar amounts for illustrative purposes only. When we express the rebate as a dollar amount, we assume that Public Investing is earning $0.36 in PFOF Revenue on each executed option contract, which is the case as of April 1, 2024. Public Investing’s payment for order flow rates may change in the future, in which case the rebate percentage will convert into a different dollar amount.*

3. Successfully deposit funds into their Public Investing brokerage account.
4. Apply to enable options trading on their Public Investing brokerage account and be approved for options trading.
